HTML TABLE

PART 2

HTML Table

HTML Table

Company	Contact	Country
Alfreds Futterkiste	Maria Anders	Germany
Centro comercial Moctezuma	Francisco Chang	Mexico
Ernst Handel	Roland Mendel	Austria
Island Trading	Helen Bennett	UK
Laughing Bacchus Winecellars	Yoshi Tannamuri	Canada
Magazzini Alimentari Riuniti	Giovanni Rovelli	Italy

Defining an HTML Table

[Table 1]

- An HTML table is defined with the `<table>` tag.
- Each table row is defined with the `<tr>` tag.
- A table header is defined with the `<th>` tag.
- By default, table headings are bold and centered.
- A table data/cell is defined with the `<td>` tag.

```
<table style="width:100%">
  <tr>
    <th>Firstname</th>
    <th>Lastname</th>
    <th>Age</th>
  </tr>
  <tr>
    <td>Jill</td>
    <td>Smith</td>
    <td>50</td>
  </tr>
  <tr>
    <td>Eve</td>
    <td>Jackson</td>
    <td>94</td>
  </tr>
</table>
```

HTML Table - Adding a Border

[Table 2]

If you do not specify a border for the table, it will be displayed without borders. A border is set using the CSS **border** property:

Example

```
table, th, td {
    border: 1px solid black;
}
```

Firstname	Lastname	Age
Jill	Smith	50
Eve	Jackson	94
John	Doe	80

HTML Table - Collapsed Borders

HTML Table - Collapsed Borders [Table 3]

If you want the borders to collapse into one border, add the CSS **border-collapse** property:

Example

```
table, th, td {
    border: 1px solid black;
    border-collapse: collapse;
}
```

Firstname	Lastname	Age
Jill	Smith	50
Eve	Jackson	94
John	Doe	80

HTML Table - Adding Cell Padding

HTML Table - Adding Cell Padding

Cell padding specifies the space between the cell content and its borders.

If you do not specify a padding, the table cells will be displayed without padding.

To set the padding, use the CSS **padding** property:

Example

```
th, td {
    padding: 15px;
}
```

Firstname	Lastname	Age
Jill	Smith	50
Eve	Jackson	94
John	Doe	80

Try to change the padding to 5px.

HTML Table - Left-align Headings

HTML Table - Left-align Headings

By default, table headings are bold and centered.

To left-align the table headings, use the CSS **text-align** property:

Example

```
th {
    text-align: left;
}
```

Firstname	Lastname	Age
Jill	Smith	50
Eve	Jackson	94
John	Doe	80

HTML Table - Cells that Span Many Columns

[Table 4]

HTML Table - Cells that Span Many Columns

To make a cell span more than one column, use the **colspan** attribute:

Example

```
<table style="width:100%">
  <tr>
    <th>Name</th>
    <th colspan="2">Telephone</th>
  </tr>
  <tr>
    <td>Bill Gates</td>
    <td>55577854</td>
    <td>55577855</td>
  </tr>
</table>
```

Basic table :
2 row, 3 column

Cell that spans two columns:

Name	Telephone	
Bill Gates	55577854	55577855

HTML Table - Cells that Span Many Rows

[Table 5]

To make a cell span more than one row, use the **rowspan** attribute:

Example

```
<table style="width:100%">
  <tr>
    <th>Name:</th>
    <td>Bill Gates</td>
  </tr>
  <tr>
    <th rowspan="2">Telephone:</th>
    <td>55577854</td>
  </tr>
  <tr>
    <td>55577855</td>
  </tr>
</table>
```

Basic table :
3 row, 2 column

Cell that spans two rows:

Name:	Bill Gates
Telephone:	55577854
	55577855
